

TWIN-SCREW PUMP SYSTEM

SEAMLESS TRANSFER FOR VISCOUS AND COLD PRODUCTS

The Twin-Screw Pump System delivers clean, continuous product transfer. This construction also eliminates manual handling and reduces contamination risk. Engineered for high-viscosity applications, the closed transfer system streamlines movement to formers, optimizes cold product flow, and facilitates greater automation.

TECHNICAL FEATURES OF THE TWIN-SCREW PUMP SYSTEM

- 500 lb to 10,000 lb capacity
- Creates a closed system for transfer and eliminates foreign materials
- Outputs up to 30,000 lb per hour, depending on product
- Specialized for viscous products
- Ideal for cold product movement to formers
- Eliminates the need for carts to move product
- Opens automation opportunities with automatic filling
