

VACUUM METERING SYSTEM

GENTLE TRANSFER WITH MODULAR CONTROL

Our Vacuum Metering System is a smart, configurable solution for controlled product transfer. Engineered with modular components, advanced controller technology, and rugged construction, the VMS ensures accurate measurements and smooth dispensing across every batch.

TECHNICAL FEATURES OF THE VACUUM METERING SYSTEM

- Supports transfer rates from 2,000 lbs to 20,000 lbs per hour for any application
- Adjustable transfer head simplifies installation and adapts to unique line requirements
- Separate portable cart for the vacuum pump improves mobility and maintenance
- Vacuum gauges monitor pressure and deliver accurate measurements with digital gauges and sensors
- Paddle portioning gently dispenses product evenly across conveyors
